## Web / System Developer and Data Analyst

1209 Gumamela St. Riverside,  
Quezon City, 1121, Philippines  
jimfalar@gmail.com  
09369481844

Passionate full-stack web / system developer with 1 year of experience in building dynamic and responsive websites using modern front-end frameworks and back-end technologies

MIS Administrator / Data Analyst with 2 year of experience in leveraging data to drive business decisions. Skilled in data visualization, and statistical analysis. Seeking a data analyst role to use my analytical skills to provide insights and recommendations for business growth."

## Work Experience

June 2023 - Present

Web / System Developer (Full Time)

Far East Fuel Corporation

Developed an integrated system to streamline all company transactions. This solution ensures seamless data flow, enhances accuracy, and enables paperless transactions, significantly improving efficiency and transparency across all departments.

March 2023 - June 2023

Web / System Developer (Part-Time)

Bandalle Marine and Industrial Corporation

Develop Inventory System

An Inventory System is a software application that tracks and manages stock levels, orders, and deliveries of products. It helps businesses keep track of their inventory in real-time, reducing the risk of stockouts and overstocking. The system enables managers to make informed decisions on when to reorder and how much to order.

January 2023 - March 2023

Web / System Developer (Part-Time)

Mautigu Collection Services Corporation

Develop a Field Report System

A Field Report System is a software application designed to collect and manage data from field operations. It enables field workers to record and report information such as location, activity, and incidents in real-time. The system provides managers with real-time visibility into field operations, enabling them to make data-driven decisions.

January 2021 - June 2023

MIS Administrator / Data Analyst

Mautigu Collection Services Corporation

As a MIS Administrator and Data Analyst, I manage and maintain the technology infrastructure used by our organization's Management Information Systems department. I troubleshoot technical issues, manage databases, servers, user accounts, and permissions, and provide technical support. I also monitor system performance and make recommendations for hardware and software upgrades
